

1	Review of Mechanics	
1.1	Newtonian Mechanics	4
1.2	Why Do we need Relativity?	4
1.3	Galilean Relativity	4
1.4	Historical Development	4
1.5	Lagrangian and Hamiltonian (Brief Overview)	4
2	Special Relativity – I	
2.1	Postulates of Relativity	5
2.2	Derivations of Lorentz Transformation	5
2.3	Length Contraction	5
2.4	Time Dilation	5
2.5	Addition of Velocities in SR	5
2.6	Concept of Spacetime	5
2.7	Metric and Its Invariance	5
2.8	Worldlines and Light Cones	5
2.9	Relativistic Doppler Effect	5
3	Special Relativity – II	
3.1	Index Notations	6
3.2	4-Vectors and Examples	6
3.3	Momentum in Special Relativity	6
3.4	$E = mc^2$ Mass-Energy Equivalence	6
3.5	Conservation of Energy and Momentum	6
3.6	Calculus in Special Relativity (Preparatory for GR)	6
